

## The Jewish Future

---

What is apparent to me is ... "It must already be written" in some holy book ... a book that has not been written yet ... as to the fate of Israel and the Jews ... in the immediate future ... and in the future of mankind in 10,000 years from today.

On the surface we want to believe today's Jews have some of the best minds when it comes to technology, mathematics, economics ... and can't forget our intellectual heights we have climbed with the Talmud and the Zohar ... and the many fabulous movies that touch millions of hearts on our planet ... movies created by Jews that tell our Jewish stories.

But when it comes to politically "marketing" to the world who Israel is and is not ... and who Jews are and who they are not ... and telling their story as to what their true desires are to co-exist in the world ... it is a shame that only a handful of individuals really know ... not even 10% of Jews understand ... no make that not even 5% of Jews really understand ... and probably even less.

Tell me who and what is to blame as how and why the world's dislike for Jews is growing once again. It just very well might be a terrible disease Jews have become susceptible to ... the destructive disease that can wipe out a civilization ... and today it effects way too many Jews ... it is the unfortunate disease of "Complacency" ... deep Complacency that thrives in the heart and soul of those who have it

Perhaps we are not as smart as we Jews think we are ... and too many are caught in the belief that we are the "Chosen" therefore there is nothing to worry about ... and before you know it, the disease of Complacency has spread to yet another and another. We look for cures for diseases of all kinds ... what if we could only find a cure for the disease of Complacency.

There can be no denying that soon a great awakening on our planet will be upon us all. For those who can fully grasp this reality and understand what it means to the survival Jews, it is their job to make sure those precious Jewish seeds, seeds of the DNA nature ... and seeds of intellectual and spiritual teachings that make Jews, Jews, continue to flourish in the next millennium.
